# T2/T4/T6 sharing adjustment

◆ **Orthogonal steering in YASP (vertical) => Splitter 1 and splitter 2**

- **With the Splitter 1, the sharing between T2 and T6 is modified. Putting a > 0 value, gives more beam on T2. Putting a < 0 value, gives more beam on T6**

- **With the Splitter 2, the sharing between T2 and T4 is modified. Putting a > 0 value, gives more beam on T2. Putting a < 0 value, gives more beam on T4**
